De Kalb and Trudeau Streets

St. Louis, Mo.,

December 31, 1929.

General Calles,
Ex President of Mexico
Mexico City, Mexico

Dear Mr. Calles:

We notice in an issue of Country Life a magazine published in the United States some very handsome pictures of some large barns that you have just recently built.

We wonder if you have equipped these barns with Lightning protection, if not it seems to us that that is one very necessary thing that should be done.

We are the largest manufacturers of lightning rod in the United States, and perhaps in the world and we would be very much pleased to submit the necessary specifications for protecting these buildings thoroughly with Lightning rods.

We have sold quite a good many jobs of lightning rods in the Mexican Republic, among others the Bank of Mexico in the City of Mexico, and a group of Government buildings that were built there some two or three years ago.

We would be very much pleased indeed to hear from you in regard to this work, and will arrange to have it done in the most approved manner, if we get the job.

Thanking you in advance for any information you can give us, we remain,

Yours very truly,

ST. LOUIS LIGHTNING ROD CO.
