4841 LaRoda Ave., Eagle Rock City California, Sept. 22d/1924.

His Excellency Plutarco Elias Calles,  
Newly elected President of  
The Mexican Republic.  
Mexico City, Mexico.

My dear President Calles:-

It will not be very long before your Inauguration and before you will become President of the Mexican Republic and therefore I take the liberty to write you concerning certain matters concerning the future in which may be of interest to you as the head of your Republic etc.

I am interested in the developing of natural resources in U.S.A. or in any foreign countries anywhere, this being a fact I will state that if you are willing to co-operate with me, that I will be very pleased to do likewise with you in the matter of getting together and work out ways and means wherein you can if you so desire to develop many of the natural resources of your Republic.

I am in a position wherein I can give you a most wonderful amount of help in doing this, in various ways, financially and other wise, I am in position to help you develop your country if you care to consider doing so, for the benefit of your self, your country and its people. I herein inclose you a separate sheet on which outlines the line of business I am engaged in and it will briefly outline to you how I can be of assistance to you in such a matter.

I might suggest that a plan might be worked out between us of ways and means for the general development of various lines of the natural resources of Mexico for the Mexican Republic, on similar or on the same lines as I now operate on with private interests for their properties etc. I am in position to raise the finances for doing it as I am doing the same thing for others.

I am in close touch with considerable capital, I am in no way associated with any oil interests or other interests now operating in your Republic, you will understand what I mean when I say this, I am independent of any such present interests now operating in Mexico. And I can place you in touch with considerable capital if you care to be so placed at any time.

I am writing you personally and direct other than to take this matter up through any of your personal friends, several of whom I well know. I would be pleased to go into the above matters with you in person at any time if possible or would be willing to go into the matter here in Los Angeles at any time if you cared to send a special representative to Los Angeles to investigate what I can do for you and how it can best be accomplished. I can help you more than any other one man can do, this I am sure of and no mistake about it.

Yours very truly.

Irving P. Roswell.

*Roswell*

P.S.-If interested I can furnish you ample references concerning my self or associates etc. at any time if desired.

4841 LaRoda Ave., Eagle Rock City California, U.S.A.

EXPERT SCIENTIFIC PROSPECT DRILLING, EXPLORATION OPERATORS AND DEVELOPERS OF  
NATURAL RESOURCES.

To owners of large tracts of unproven oil lands in U.S.A. or in any foreign countries, anywhere if such land shows real indications of being oil, coal, mineral or chemical bearing etc.

I am interested in receiving proposals for drilling.

For the proving up of new prospective oil fields, coal mineral or chemical lands for a percentage of the land holdings, we do not contract to drill by the foot, we are exploration operators exclusively.

FOR PRESENTATIONS OF PROPOSALS.

If your land is oil bearing I am interested in receiving reports of geologists, engineers or technical men of recognized qualifications together with a map showing exact location and any other data which you can furnish me, with this in hand I can very quickly advise you whether I will be interested in making further investigations of your holdings with a view of entering into a contract to drill and prove it up and place it on a commercial basis for you.

We are EXPERT SCIENTIFIC WILDCAT prospect drillers, our work is purely exploration. We seek to develop new oil fields or structures, and we are interested in no other phase of development. We have the very latest and best equipments known to modern science and we do hold a most decided advantage over all other drillers in being able to prove up new prospective fields. We are continually drilling all the while somewhere, and will soon be the largest drilling concern in existence.

The development of our specially designed equipments for testing prospect drilling makes it possible for us to take cores 25 feet long by 10 inches or more in diameter at the same time the well is being drilled so the rock strata and the fine loose oil sands intact unmixed with drilling mud or water as drilled through may be physically examined and its contents and character accurately determined at all times: This eliminates all guess work and risk of "passing up" any oil stratum which might be productive: This feature alone is of vital importance to the land owner or lease holder, because if his property is drilled by the usual methods and the oil sands thereby mudded up and his property is abandoned as "dry" as is the case in a very great many instances, his land may never again be drilled again by anyone and as you well know a great many good oil fields are being lost annually in just this way, with us this can never occur neither do we ever have any fishing jobs and we do not use casings, we have no guess work and always know just what we are about.

Among my associates are some of the best known and recognized expert consulting geologists, engineers and chemists in the world and we are ready at all times to make technical and complete examinations, reports or scientific tests on lands, properties or propositions, or to help pull you out of any kind of difficulties with your oil wells or in any other branch of the oil industry. The very same conditions also apply to all kind of mining especially placer, coal, minerals or chemicals, Hydro-Electric Power Propositions, dredging, irrigation or engineering problems of all kinds pertaining to the development of natural resources anywhere if on a large scale.

Locally I can be reached on phone any morning or evening by calling GARFIELD 2922, otherwise by mail as above indicated. If at any time you have any offerings to submit for my consideration I will be glad to hear from you and will give the matter my personal attention for quick action.

IRVING P. ROSWELL.
